FOR STEEL CUT

SUPER THIN KERF

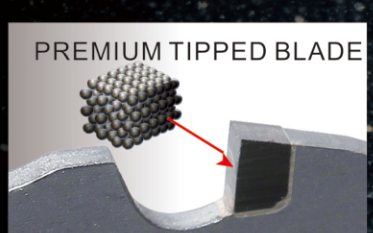
For stainless cutting FSS

STAINLESS CUTTING SAW BLADE

SUPER THIN KERF SAW BLADE BRINGS THREE ADVANTAGES

FAST CUT

Reduces cutting resistance with unique design in thin kerf and saw body. It brings smooth & sharp cut, and improves workability at job site.

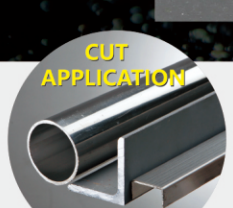


LONGEVITY

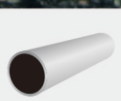
Adopting the newest grade CermetTips, which outperforms in wear resistance. It makes lifetime longer dramatically.

EXCELLENT STRAIGHT RUNNING CUT

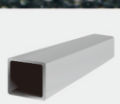
Unique tooth geometry (wide and shallow pocket) is effi cient in making a balance on the blade and improving stability in straight running cut.



Angle Iron



Stainless Pipe



Square Tubing

Stainless Plate

Stainless Rebar

Various Stainless Steel Material (SUS304)

Part code	Diameter inch (mm)	Kerf (mm)	Thickness (mm)	Arbor (mm)	Number of teeth	MAX RPM (min^{-1})	Suitable cutting thickness	Low noise reduction slit
FSS-100K	3 15/16"(100)	1.6	1.2	20	20	13,000	2.0	
FSS-110K	4 5/16" (110)	1.6	1.2	20	22	13,000	2.0	
FSS-125K	4 15/16"(125)	1.6	1.2	20	26	9,600	2.0	
FSS-160K	6 5/16" (160)	1.8	1.4	20	52	6,000	3.0	
FSS-180K	7 1/16" (180)	1.8	1.4	20	60	5,500	3.0	
FSS-185K	7 5/16" (185)	1.8	1.4	20	60	5,500	3.0	
FSS-305K	12" (305)	2.0	1.6	25.4	80	1,700	6.0	●
FSS-355K	14" (355)	2.2	1.8	25.4	90	1,500	6.0	●

◎ After cutting, less burn and less burrs

◎ In order to maintain sharp cutting, it design proper number of teeth and teeth grinding

Angle steel, pipe and hanger rails

Diameter 100~355mm

Diameter 100~125mm
Diameter 305~355mm

⚠ Do not use on angle grinder and high-speed abrasive cutting saw, because it's dangerous.
